CONFERENCE² TABLES

Woodtech's table design program integrates different tabletop shapes and sizes, a variety of veneer treatments, inserts, and inlays, as well as a number of base options. Technological advances in power, data and voice have been integrated into all designs. • Woodtech's high level of craftsmanship is achieved through the selection of premier veneers and personally handpicked hardwoods. Our engineering department will provide CAD drawings for custom pieces and an experienced workforce will, step by step, hand make your table. Finally, our thirteen step finish will ensure a beautiful and lasting product.

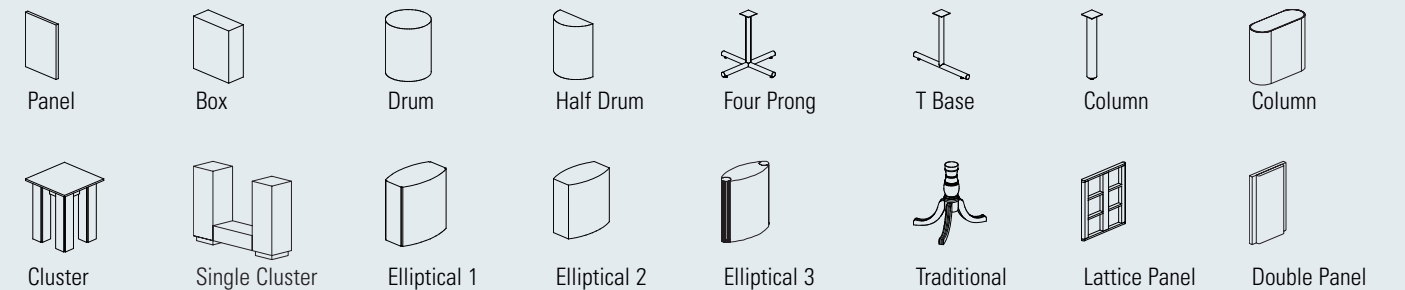

Table Shapes

STANDARD CONFERENCE TABLES

The standard program from Woodtech offers a variety of tabletop shapes, edge details and bases in wood and/or metal. Available veneers include maple, oak, walnut and cherry, with a total of twenty three finishes. Design combinations are endless, with a number of electrical components completing the program. All units have power, voice and data options.
